

# Medicare Supplement (Medigap)

## Issue-Age, Attained-Age & Community Rated Pricing

Type of Pricing	How it's Priced	What this Means for You	Examples
<p><b>Community-Rated</b> (also called "No-Agerated")</p>	<p>Generally the same monthly premium is charged to everyone who has the Medigap policy, regardless of age.</p>	<p>Your premium isn't based on your age. Premiums may go up because of inflation and other factors but not because of your age.</p>	<p>Mr. Smith is 65. He buys a Medigap policy and pays a \$165 monthly premium.</p> <p>Mrs. Perez is 72. She buys the same Medigap policy as Mr. Smith. She also pays a \$165 monthly premium because, with this type of Medigap policy, everyone pays the same price regardless of age.</p>
<p><b>Issue-Age-Rated</b> (also called "Entry Age-Rated")</p>	<p>The premium is based on the age you are when you buy (are "issued") the Medigap policy.</p>	<p>Premiums are lower for people who buy at a younger age and won't change as you get older. Premiums may go up because of inflation and other factors but not because of your age.</p>	<p>Mr. Han is 65. He buys a Medigap policy and pays a \$145 monthly premium.</p> <p>Mrs. Wright is 72. She buys the same Medigap policy as Mr. Han. Since she is older when she buys it, her monthly premium is \$175.</p>
<p><b>Attained-Age-Rated</b></p>	<p>The premium is based on your current age (the age you have "attained"), so your premium goes up as you get older.</p>	<p>Premiums are low for younger buyers but go up as you get older. They may be the least expensive at first, but they can eventually become the most expensive. Premiums may also go up because of inflation and other factors.</p>	<p>Mrs. Anderson is 65. She buys a Medigap policy and pays a \$120 monthly premium, however:</p> <ul style="list-style-type: none"> <li>• At 66, it increases to \$126.</li> <li>• At 67, it increases to \$132.</li> </ul> <p>Mr. Dodd is 72. He buys the same Medigap policy as Mrs. Anderson. He pays a \$165 monthly premium. His premium is higher than Mrs. Anderson's because it's based on his current age. Mr. Dodd's premium will go up each year:</p> <ul style="list-style-type: none"> <li>• At 73, it increases to \$171.</li> <li>• At 74, it increases to \$177.</li> </ul>

**NOTE:** Not all states allow all three types of rated pricing. All Medigap policies will have rate increases due to inflation.
